

Job Description

AegisUSA is currently seeking a Solution Engineer, experienced in Single Sign On utilizing SAML, to join our team. A qualified candidate would be able to work with client personnel to analyze and evaluate current Access Management needs, and utilize that information to design, implement, test, and support Single Sign On solutions using Shibboleth and/or Central Authentication Service (CAS). The Solution Engineer will be seen as a subject matter expert in the field of Access Management.

Responsibilities:

The responsibilities would include:

- Serve as key member of Access Management implementation team
- Design and architect overall Access Management solutions using either Shibboleth and/or CAS.
- Hands-on development, testing and implementation of customer solutions using Shibboleth and/or CAS
- Install, configure and provide insight to end-to-end Shibboleth/CAS solutions
- Document detailed technical requirements and functional specifications directly with client team.
- Assist in pre-sales activities
- Mentor other Identity and Access Management professionals.

A successful candidate will demonstrate a methodology to capture an understanding of the client's existing Identity and Access Management capabilities, be able to develop a delivery plan to configure and optimize an enhanced solution, and ensure customer satisfaction through on-time and on-budget delivery. As a Solutions Engineer, you are an essential member of a small, focused team working on the development and delivery of revolutionary Identity and Access Management technology.

Requirements:

- Masters or Bachelor's degree in Information Technology, MIS, or Computer Science.
- Experience with various application servers and Enterprise Identity Management technologies such as LDAP, Active Directory, Kerberos, Web SSO, Shibboleth, CAS.
- Strong experience with the following:
 - SAML
 - LDAP
 - Network Architecture
 - System Administration
 - Experience with Shibboleth or CAS a plus
- Dedication to teamwork and knowledge exchange
- Advanced written and verbal communication skills

- Integrity within a professional environment
