Former Sun Executive Bob Lamvik joins Aegis as Chief Operating Officer
Responding to rapid growth opportunities and market acceptance of the Trident HE Identity and Access Management Platform

Greenwood Village, CO — February 1, 2011 — AegisUSA today announced that Bob Lamvik has joined the AegisUSA Executive Team as Chief Operating Officer. Bob will be responsible for all aspects of daily operations in this fast growing software and professional services organization.

According to Ralph Armijo, Founder and CEO of AegisUSA: "We are thrilled to have Bob join our team. His background running Field Operations for Sun's North, South, and Central America software team is particularly valuable to the Aegis strategy. We are in the midst of aggressive growth since our introduction of Trident HE, and Bob's experience will allow us to continue to scale. Additionally, since he has been active as an Aegis Board Member since 2004, we know he will be effective immediately."

Bob Lamvik points out, "I'm positive this is the right move at the right time. The Trident HE IAM platform brings unprecedented value, an open architecture, and contemporary solutions such as Cloud provisioning and Federated Identities through InCommon to the marketplace. The Aegis success in Higher Education is accelerating, and we look forward to add new industry segments as well. The market disruption caused during Oracle's integration of Sun's IdM software stack is an excellent growth opportunity for Aegis today."

About AegisUSA

Founded in 2004, AegisUSA is a leading provider of Identity and Access Management (IAM) products and services. AegisUSA offers a broad portfolio of cost-effective open standards-based IAM solutions including: Enterprise IAM Suite, TridentHE IAM Suite (focused on Higher Education), and specialized pre- package IAM Appliances. Part of AegisUSA's superior solutions includes employing consistent, standards-based implementation methodologies supporting the entire IAM implementation — not just the software. AegisUSA's technology-enabled methodology delivers a significant reduction in implementation costs and timeframes compared to traditional implementations without AegisUSA. For more information, please visit AegisUSA on the web at www.aegisusa.com.
