AegisUSA Introduces Affordable, Scalable, Identity Management Appliances for Higher Education and K-12

AegisUSA Announces Identity Appliances, Point-Based Solutions Starting At \$50,000

Greenwood Village, CO — September 19, 2009 — AegisUSA today announced its appliance-based Identity Management Point Solutions for Higher Education and K-12. With a 30-day deployment timeframe and an entry level price starting at \$50,000, AegisUSA's identity appliances are perfect for educational institutions facing identity business challenges, shrinking IT budgets, and fast-approaching deadlines.

[AegisUSA's identity appliances](#) are turnkey point solutions that deliver enterprise-level functionality at a price point that all educational institutions can begin to consider. Released appliances include: [Password Management](#), [Single Sign-On \(SSO\)](#), [Federated Identity InCommon® Quickstart](#), and [Google Apps Provisioning](#) with additional point solutions planned in the near future. The appliance based approach revolutionizes the delivery of enterprise level identity management solutions for Higher Education and K-12.

"AegisUSA understands that each education institution's identity requirements are unique. By providing a range of solutions that solve specific identity business problems; our clients can now afford to tackle their most pressing identity challenges knowing they can scale with our enterprise-level software to accommodate future growth and change," stated Ralph Armijo, CEO.

About AegisUSA

Founded in 2004, AegisUSA is a leading industry partner of Sun Microsystems and Oracle Corporation that provides Identity and Access Management (IAM) solutions with domain expertise as proven in their installed base of over 50 successful IAM implementations in education. AegisUSA provides a complete continuum of world-class, [enterprise-level IAM solutions](#) ranging from affordable appliance based point solutions, custom solutions, managed delivery solutions and soon “Identity as a Service” solutions. Additionally, AegisUSA employs consistent standards-based implementation methodologies allowing them to support the entire IAM implementation — not just the software. AegisUSA's technology enabled methodology delivers a significant reduction in implementation costs and in implementation timeframes compared to traditional implementations without AegisUSA.
